

WHO IS CARLO RINOMATO?

CARLO RINOMATO – President design Generation Homes

Avant-garde Builder/Developer Carlo Rinomato is proud to release his project **PANFILO, 'Condo of the Sea'** overlooking the beautiful Adriatic Sea in San Vito Chietino, Abruzzo Italy. Abruzzo is located in central Italy along the Adriatic coast. It contains 3 national parks, hilltop medieval/renaissance towns and numerous nature reserves. The Apennine Mountains form much of its interior, and the coastal plain has sandy beaches. The natural blend of water and mountains are what gives Carlo his purest form of inspiration. His masterpieces have always portrayed pure organic architecture and creativity. His goal is always to blend "harmony with humanity".

As a child, Carlo experienced many beautiful places. Carlo's dream to build in Italy evolved through his love and appreciation for the country where he spent most of his young life as a child and teenager. His constant return to this homeland brought on a new inspiration he wanted to share with the world. Carlo's architectural design is based on the philosophy of "less is more". He uses the environment as his blank canvass. Italians, value the quality of life more than the quantity of things. They appreciate their exquisite scenery, seas, food and night life; culture is embraced at its maximum. They live and appreciate la dolce vita.

"The inspiration of PANFILO, 'Condo of the Sea' is to have a seamless attachment to nature; a condo built with glass walls and seamless lines portraying a direct view of the Adriatic Sea on each level. There is no better serenity than water to emit the calmness in all of us. Italy is romantic, historic, and recognized by everyone as one of the world's most beautiful countries. Stay tuned for more details on the release of this exciting project. **You'll love the way it looks, but be inspired by how it makes you feel,**" says Carlo Rinomato, President of design Generation Homes.
